

dashboard_public.html overview

Location: ai-bots/Thermostats/Web/dashboard_public.html

Purpose: Public-facing thermostat dashboard for Lockout Music Studios (Oceano Beach, CA)

Layout:

- Header with company name and logo placeholder.
- Timestamp row showing generated timestamp.
- Grid of metric cards with latest data: timestamp, type, building temp, setpoint, outside temp, equipment status

History panel:

- Show or hide the history chart; displays condenser runtime total and estimated cost
- Chart controls toggle series (set point, building temp, outside temp, equipment status)
- Chart.js canvas renders temperature and status history; history list can sum up runtime and cost

Data and behavior:

- Inline JSON payload supplies latest row, history series (setpoint, actual, outside temp, equipment status)
- Uses inline data when available; can fetch archive JSON files from 'chart history' endpoint
- Colors metric cards based on values (temperature gradients, fan/cooling status)
- Autoplay cycles chart modes and pauses to show the logo; user interaction resumes
- Estimates condenser runtime/cost and reports outside conditions and fan/cooling status

Visual assets: references Hands.png, LO_Logo.png, and weather icons in the weather card

Notes: Sample data in the HTML shows latest building temperature 95 F, setpoint 75 F, outside temperature 75 F, equipment status 'on'
