

Timothy Inman

SUMMARY

Motivated, reliable professional with a strong background in customer care, technology, and process improvement. Experienced in providing empathetic support, building trust, and ensuring the well-being of individuals. Adept at adapting to new environments, collaborating with diverse teams, and maintaining a positive, human-centered approach. Committed to supporting individuals with developmental disabilities in a residential setting with compassion, patience, and reliability.

Key Skills

- Compassionate Care & Support
- Empathy & Active Listening
- Reliability & Punctuality
- Communication & Teamwork
- Problem Solving
- Adaptability
- Conflict Resolution
- Process Improvement
- Safety Awareness

Recent Achievements

- Designed and built automated HVAC/Thermostat dashboards with runtime analysis, condenser cost calculation, weather API integration, and animated Chart.js visuals.
- Built automation frameworks for recruiters and employers including resume analyzers, job-lead processors, scoring tools, and Excel workflow engines.
- Implemented end-to-end Python automation systems launched through batch files, enabling zero-cost workflow orchestration.
- Developed self-updating dashboards, Google Drive push utilities, JSON-driven configuration engines, and multi-site thermostat configuration tools.
- Created demonstration modes with automated cycling, dataset animations, UI transitions, and accessibility-focused layouts.
- Standardized ID, naming, and schema structures across all automation projects to ensure clarity and maintainability.
- Developed HTML/JavaScript dashboards with interactive legends, tooltips, high-contrast modes, and responsive UI components.
- Demonstrated Human-EI engineering workflows where the human directs architecture and EI executes development tasks.

Professional Experience

Customer Care Senior Advisor - Best Buy, Carlsbad, CA (September 2019 - September 2025)
