

Timothy Inman

Automation Engineer

Human-centered Automation Engineer who understands that people aren't being replaced — their roles are evolving. I design AI/EI workflows where automated systems handle execution while people guide, oversee, and validate the process. My work focuses on building scalable automation, optimizing data workflows, and creating accessible, human-guided systems that improve efficiency without removing the human element.

Automation | GENESYS Cloud | MS Dynamics/CRM | Scripting | C#.NET | VBA | Python | HTML/CSS | Team Foundation Server | JavaScript | Cross Functional Collaboration | Business Planning | Zapier | Shopify | Make

AI / Automation Engineering Achievements (2024-2025)

- Designed and built automated HVAC/Thermostat dashboards with runtime analysis, condenser cost calculation, weather API integration, and animated Chart.js visuals.
- Built automation frameworks for recruiters and employers including resume analyzers, job-lead processors, scoring tools, and Excel workflow engines.
- Implemented end-to-end Python automation systems launched through batch files, enabling zero-cost workflow orchestration.
- Developed self-updating dashboards, Google Drive push utilities, JSON-driven configuration engines, and multi-site thermostat configuration tools.
- Created demonstration modes with automated cycling, dataset animations, UI transitions, and accessibility-focused layouts.
- Standardized ID, naming, and schema structures across all automation projects to ensure clarity and maintainability.
- Developed HTML/JavaScript dashboards with interactive legends, tooltips, high-contrast modes, and responsive UI components.
- Demonstrated Human-EI engineering workflows where the human directs architecture and EI executes development tasks.

EXPERIENCE

Best Buy, Carlsbad CA — September 2019 - September 2025

Customer Care Senior Advisor

Managed incoming and outgoing calls in all financial and technical queues, achieving consistent 100 percent CSAT through empathy and meaningful connection.

- Ranked #1 in recent call center performance metrics and consistently top 10 each month.
- Collaborated with leadership on process improvements to increase productivity and accuracy.
- Delivered a 10-month special project in 2 months by developing an automated Excel solution.
- Completed training in November 2019; promoted to Senior Advisor in February 2020.

Walmart, Oceanside CA — February 2018 - September 2019

Electronics Sales Associate

Managed the Photo Center and drove technology improvements that increased customer satisfaction by 50 percent.

TIMDOC Solutions, Portland ME — March 2017 - February 2018

Owner

Developed innovative workflow and home automation solutions.

Tyler Technologies, Yarmouth ME — August 2004 - March 2017

Software Developer

- Supported Tyler employees during implementation cycles.
- Developed productivity solutions for municipalities across the U.S.
- Architected a custom solution removing dependency on third-party software.
- Researched and implemented replacement forms engine for Tyler Forms.

Direct Mail of Maine, Scarborough ME — July 1997 - August 2004

Laser Room Department Manager

- Managed print production using high-speed OCE laser printers.
- Automated all manual mail presorting processes, cutting processing time in half.
- Automated day-to-day print workflows, eliminating need for additional staffing.

EDUCATION

High School Diploma — Stearns High School, Millinocket, ME

Generative AI Mastermind — Outskill (Online) — 10/18-19/2025
