

AI Bot Folder Structure Overview

Author : User Workspace

Date : 2025-11-22

Project Folders

- config-editor
 - release-tracker
 - automation-assistant

Each folder contains structured subdirectories to isolate documentation, assets, and automation.

Folder Structure Template

```
/ai-bots/  
/config-editor/  
/source/  
/bot-assets/  
/scripts/  
SOP.md  
/release-tracker/  
/source/  
/bot-assets/  
/scripts/  
README.md  
/automation-assistant/  
/source/  
/bot-assets/  
/scripts/  
README.md
```

Accessibility Settings

- All documentation and visuals are designed with dark-mode and high contrast
 - Supports visually impaired contributors by default
 - Visual assets should maintain readability with dark backgrounds and accessible fonts

Workflow Notes

- All .py scripts should be updated to reflect new resource paths
 - Each project is self-contained to allow for independent development, versioning, and deployment
 - A migration_log.md should exist in each folder if restructuring occurred
